AWARDED TWO GOLD MEDALS

Glenwood Ranges are Handsome, Convenient and Mechanically Right—no modern features lacking. Smooth cast, plain design, compact structure, big roomy ovens, easy working grates and countless other features. Call and see for yourself all the good things about them.

They Certainly Do

## Make Cooking and Heating Easy

Reynolds & Son, Barre

### Topics of the Home and Household.

When cleaning a light carpet, try block magnesia, rubbing it thoroughly into the carpet and then sweeping. This is a good way to clean bath-rugs that are not washable, as they do not have to be wet.

To clean white fur heat corn meal in a pan until it is as hot as the hands can bear. Put the fur in the meal and rub them as one would if using soap and water, keeping the meal hot. After a few minutes of hard rubbing shake them out thoroughly. Another way, and one par-

### CHAPPED HANDS AN AWFUL SIGHT

Sore, Red and Rough. Continually Cracking Open. Could Not Put Them In Water At All.

HEALED BY CUTICURA SOAP AND OINTMENT

"I was troubled with chapped hands which first started from exposure to the air. My hands were sore and red and rough and were continually cracking open and bleeding. They were so sore I could not put them in water at all nor even sweep the floor. They were swollen and an awful sight and I didn't want anyone to see them.

"I noticed Cuticura Soap and Ointment advertised and I sent for a sample. The sample seemed to do so much good that I bought more, and after I had used two bars of Cuticura Soap and one and one-half boxes of Ointment my hands were healed." (signed) Miss Mae Mattie, 32 Whipple St., Pittsfield, Mass., Aug. 1, 1915.

Sample Each Free by Mail With 20-c. Skin Book on request. Address post-card "Cuticura, Dept. T, Boston." Sold throughout the world.

ticularly recommended for children's white "house" coats, is to rub them with stale bread. As soon as the bread becomes soiled and crumbly take a clean piece. Continue doing this until the whole surface has been gone over thoroughly; then take a perfectly clean comb and comb the fur the right way.

#### To Make a Fireless Cooker.

Take two large cans, a 50-pound can and a 25-pound can. In the bottom of the larger can place two inches of paper pulp, made by tearing newspapers into shreds and soaking them in water. The padding should be firmly stamped down and the smaller can be placed upon this. Then fill the space between the two cans with the pulp, taking care to clamp it tightly. The padding should extend to within one inch of the top of the smaller can, allowing only enough space to fit the lid. A half gallon granite or aluminum kettle can be used for the cooking vessel. The food is brought to a boil in the vessel, when it is covered and placed in the cooker as quickly as possible. The lid of the smaller can is placed in position. Several thicknesses of cloth then go in and the whole is covered by the lid of the larger can.

#### A Garden Modiste.

If Eve were living now, and styles were like hers long ago, My little garden could provide A beautiful trousseau.

I'd plan her smock of graceful ferns, Edged round with lace-flower fine Her petticoat of lilies, held In place by ivy vine.

And long-stemmed roses would contrive The loveliest of frocks, Bordered with pale pink asters, or A fringe of hollyhocks.

Her hat I'd build of daisies, trimmed With morning glory sprays—Sun-flowers would make a parasol To raise on rainy days.

But useless 'tis to think up clothes And color schemes, since Eve's Preferred material (they say) Was just a change of leaves!

#### Good for Fall Meals.

Rice Cake—Take some left-over cold rice and heat into it one egg. Make into cakes, flour and dry. Midwinter Ice—Three cups water, three oranges (juice), three cups sugar, three bananas cut in dice, three lemons

(juice), one can chopped pineapple. Mix well the water, orange juice, lemon juice and sugar; then add the fruit. Turn into the freezer and let stand in pack two hours or more before serving.

Hashed Brown Potatoes—Chop two cold boiled potatoes rather fine, season with salt and pepper. Put a tablespoon of butter in a frying pan; when hot put in potatoes, smoothing and patting them down; stand over a moderate fire, allow them to cook undisturbed for at least eight minutes. Then with a liner knife fold over one-half as you would an omelet; stand again over fire for about three minutes; turn at once onto a heated dish. Directions must be carefully followed; the butter must be hot when you put in the potatoes. The whole must be packed firmly down, so that it will not break when turning out.

Cauliflower Soup—First, presumably the cauliflower is cooked the day before, served hot or cold. When you wash well the cauliflower, take great care to remove all grit and insects. Place it to simmer tender downward in salted water and when tender remove it. For the soup, let all the outer leaves and bits simmer well, then pass through a sieve. Fry some chopped onions, add the liquor of the cauliflower and the pieces that have been rubbed through the sieve, add a little white pepper and a slice of brown bread. Let all cook gently for half an hour. Just before serving it take out the slice of bread and sprinkle in two teaspoons of grated cheese.

Dutch Apple Cake—One pint flour, one-half teaspoon salt, same of soda, one

### PARISIAN SAGE

Puts Hair on Your Head and Helps to Keep It There.

What's the use of being bald? What sense is there in deliberately allowing your hair to turn gray? Do you want to look old before your time? Give up the thought; old age will come all too soon.

Look after your hair. Parisian Sage is a scientific preparation that supplies hair needs—It is just what you want. It aims to prevent grayness and baldness by putting life and nourishment into the hair roots. Men or women, no matter how old you are, Parisian Sage will help you to look younger and more attractive. Why not go to the Red Cross Pharmacy and get a large bottle today? It will not cost more than 30 cents, and your money back if it does not cure dandruff, stop falling hair, or itching of the scalp. It will make your hair luxuriant, bright and beautiful. It is a most refreshing, pleasant and interesting hair dressing and absolutely harmless to the hair and scalp. Adm.

teaspoon cream tartar, one-fourth cup butter, one egg, one scant cup milk, four sour apples, two tablespoons sugar. Mix the dry ingredients. Add egg, beaten, mixed with milk. The dough should be soft enough to spread over half an inch thick on shallow baking pan. Core, pare and cut the apples into eighths; lay them in parallel rows on top of the dough, the sharp edge down; press enough to make the edge penetrate slightly; sprinkle thick with brown sugar and some cinnamon and a sprinkling of currants between each row. Pour some fresh melted butter over the cake. Set in oven to bake until done. Serve cold.

### SEWED UP HIS HOGS' EYES.

Farmer Says He Did It To Prevent Their Catching Chickens.

Trenton, N. J., Sept. 11.—Because he sewed up his hogs' eyes to keep them from catching chickens, Joseph K. Leigh, a Pleasant Valley farmer, has been arrested and fined \$25 and costs. Leigh's only excuse was that "father used to do it." Some visitors in the neighborhood discovered the practice and notified Wallace P. Thornton, an S. P. C. A. officer, who made the charge. The full penalty is \$250 fine and six months' imprisonment.

### GOLD MINING IN ALASKA.

Willow Creek District Reported on By United States Geological Survey.

Gold mining in the Willow creek district, Alaska, is the subject of a report by S. R. Capps, recently issued by the United States geological survey, department of the interior, as bulletin 642-F. The region has recently been the scene of active prospecting, and plans are under way for mining in several properties as the result of the beginning of the construction of the new government railroad, which will pass along the border of this district.

For several years gold has been produced from lode mines in this region, and in 1915 the value of this product amounted to nearly \$250,000. The observation made by the government geologist at several of the more developed properties indicates that the lodes persist to considerable depth and that the ore from the deeper levels will probably be free milling. A copy of the report may be obtained free on request of the director, geological survey, Washington, D. C.

### INTO GERMAN TRENCHES

British Make More Gains on a Front of Three and One-Half Miles

THEY TAKE ALL OF GINCHY

British Penetrate Opposing Line at Several Places—Germans' Heavy Losses

London, Sept. 11.—The British, in an attack along a front of about three and one-half miles Saturday succeeded in occupying the whole of Ginchy and the territory between that village and Leuze wood, according to the announcement from general headquarters at London last night. Several other gains are also recorded.

The text of the statement reads: "We attacked this afternoon on a front of 6,000 yards, extending from High wood to Leuze wood. As a result, the whole of Ginchy village is now in our hands after severe fighting, and the ground between it and Leuze wood was captured. "Northeast of Pozieres we gained a further 600 yards of German trenches and captured 60 prisoners, inflicting heavy casualties on the enemy, who was caused by our artillery fire while making for a counter attack.

"Our artillery bombarded the enemy's trenches on Vimy ridge opposite Souchez. There was reciprocal artillery activity in the neighborhood of Calonne and Ginchy and between La Basse canal and Neuve Chapelle. Friday afternoon many air fights occurred."

French troops by a brilliant assault Saturday afternoon captured a section of German trenches each of the village of Fleury (Verdun sector), according to the official communication issued by the war office Saturday night. German attempts to retake positions in the neighborhood of Bony on the Somme front were repulsed.

### VILLA HEARD FROM AGAIN.

Bandit Tells Mexicans the "Gringos" Are Harder Fighters Than Carranzistas.

El Paso, Tex., Sept. 11.—From the seat of a wagon, Francisco Villa addressed the population of Satevo, Chihuahua, when his forces captured the town about two weeks ago, according to an American arriving at El Paso. Villa was quoted as saying: "You see before you 'Pancho' Villa, the bandit, but you see also that I am paying my soldiers in silver, and I promise you it will not be long until I have a large army. I now have plenty of machine guns and ammunition. You see that neither the 'gringos' nor the Carranzistas could catch me, even when I was ill. The 'gringos' are harder fighters than the Carranzistas, but I bear them no animosity. All that I am interested in is punishing traitors and putting an end to Carranza."

### CALLS SPECIAL SESSION.

Gov. McCall Summons Legislature to Meet on Tuesday.

Boston, Sept. 11.—Gov. McCall has issued a proclamation calling a special session of the legislature for Tuesday. This action was taken in view of a decision on Friday by the supreme court that the legislative redistricting of Suffolk county was made by an appointment commission, was null and void.

Both branches of the legislature will meet at noon on Tuesday to take up the governor's program, which includes consideration of a plan by which citizens of Suffolk county can vote in the September primaries. The enactment of a law permitting militiamen at the border to vote in the November election, with an appropriation to care for their dependents and the payment of railroad fares of men discharged from service also will be considered.

### BANGOR STRIKE OVER.

Trolley Men Vote to Go Back After Central Labor Union Withdraws.

Bangor, Me., Sept. 11.—The strike of the uniformed employees of the Bangor Railway & Electric company was called off Saturday night, by vote of the men, who quit work Aug. 26 to enforce recognition of their union. The vote followed a conference between the strike leaders and representatives of the Central Labor union, at which it developed that after the 15th support of the body would not be forthcoming. At the office of the railway company Saturday night, it was said that few of the strikers would be taken back, as their places have been filled. Full service on all lines was resumed yesterday morning.

### TONE UP YOUR STOMACH

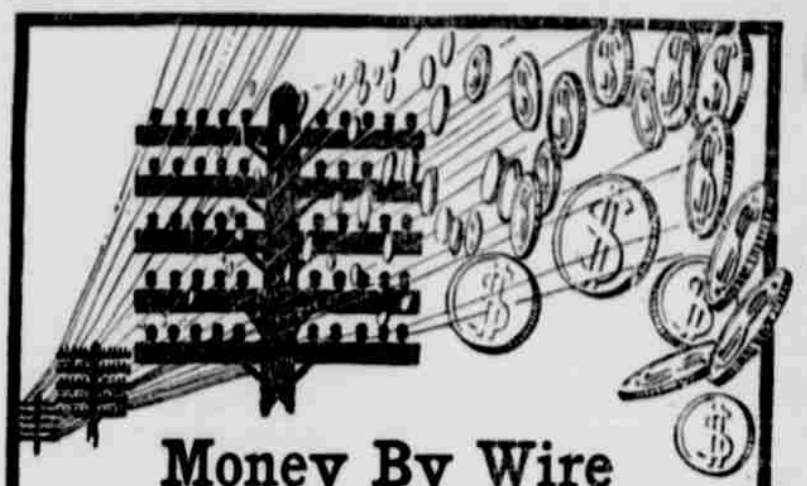

There is no tonic for the stomach that is not a tonic for every other part of the body. But the stomach depends, as does every other organ, on the blood for its energy.

There can be no perfect digestion without rich, red blood. This is scientifically true. The way then to tone up the stomach is to enrich the blood.

If your digestion is out and your blood is thin there can be no question about it. You need Dr. Williams' Pink Pills to restore the condition of your blood, use care in the selection of your diet and the stomach trouble will take care of itself.

Stomach trouble is debilitating. Dr. Williams' Pink Pills are a tonic and build up the weakened system generally. Most stomach remedies try to digest your food for you. How much better it is to tone up the stomach so that it will do its own work as nature intended. There is no pleasure in eating poorly digested food. Tone up your stomach and your appetite and digestion will soon be normal.

A diet book will be sent free on request by the Dr. Williams' Medicine Co., Schenectady, N. Y. Your own druggist sells Dr. Williams' Pink Pills or a box will be sent by mail, postpaid, on receipt of fifty cents.

### PLANS PORCH CAMPAIGN.

President, Now at Summer Home, Will Keep Active.

Shadow Lawn, N. J., Sept. 11.—President Wilson began his first vacation of the year Saturday by laying plans for the "porch" campaign which he will conduct from Shadow Lawn, his summer home at Long Branch, N. J. With Mrs. Wilson, the president arrived there at 1 o'clock Saturday afternoon from Atlantic City after a 100-mile ride along the ocean front. He went immediately to his summer residence. The president later visited his daughter, Mrs. William G. McAdoo, who is sick at Spring Lake. At night he attended a theatre. During his ride along the ocean front at Spring Lake the president was not recognized.

The president expects to get in active touch with the campaign being made in his behalf. Vance McCormick, chairman of the Democratic national committee, will go to Shadow Lawn early in the week to begin a series of political conferences. Secretary of the Treasury McAdoo Saturday discussed the campaign with Mr. Wilson in a general way. All during the afternoon a crowd of anxious persons gathered about Shadow Lawn in an effort to catch a glimpse of the president, but a large force of policemen and secret service operatives kept everyone from entering the grounds.

The executive offices were opened at Ashbury Park this morning. A force of 15 clerks and secretaries from the White House arrived Saturday afternoon and began arrangements for carrying on necessary work. The president will visit the offices only when necessary and will see all callers at Shadow Lawn. Immediately after his arrival Saturday the president got in communication with the White House but was told there was no news there of importance.

### SCOURGE FAST EBBING.

New York Sees Pest's End, and Precautions Can Be Relaxed.

New York, Sept. 11.—The end of the infantile paralysis scourge in New York is at hand, it was stated Saturday by Dr. Charles E. Banks, senior surgeon in charge of the United States public health service's campaign against the disease. There was no apparent reason why the government's officials should continue to look upon the plague as an epidemic, he asserted, adding:

"We expect that conditions will be such that we can discontinue the local certificate of travel system before the end of the coming week. The daily number of cases has not declined so rapidly as we had expected in the last week or two, but they have declined sufficiently for us to see that the end of the epidemic is at hand. I shall close down our station at Stapleton, Staten Island, on Monday, and the other stations will be closed a few days later."

The number of new cases increased by seven Saturday, to a total of 55, and there were 10 deaths, a decrease of five.

"We expect that conditions will be such that we can discontinue the local certificate of travel system before the end of the coming week. The daily number of cases has not declined so rapidly as we had expected in the last week or two, but they have declined sufficiently for us to see that the end of the epidemic is at hand. I shall close down our station at Stapleton, Staten Island, on Monday, and the other stations will be closed a few days later."

The walls of the Grand Canyon in Arizona form a great natural geological section, in which each layer of rock is in its original position relative to those above and below it. In few other places, however, is the story of the upbuilding of the earth's crust so plainly and impressively told. As a rule the geologist who would decipher the records of the rocks must get a bit here and a bit there. He may find the edges of some beds expressed in a river bluff and others sticking out on a steep mountain side. He determines by fossils or other means the order in which the beds were deposited, and by putting all his information together he constructs what he calls a columnar section for the district in which he is working—that is, a section showing the order, thickness and character of the beds. Such a section discloses the strata that form the upper part of the earth's crust at that place, just as a slice of layer cake shows at a glance the various layers of which it is composed.

After a number of districts in a region have been studied and their general columnar sections determined, the geologic history of the region can be learned by comparing these sections, just as the engineer who is drilling for low-grade copper ores compares his drill records and thus learns the outlines of the ore body. Such a comparison of the beds at one place and another shows how certain beds change in character and thickness from place to place or even thin out and disappear. It enables the geologist to draw some conclusions as to the former distribution of land and sea, to distinguish the deposits laid down in deep water from those spread by rivers over their flood plains, and to reconstruct in imagination the course of events at a time long before the beginning of the Grand Canyon. Such a comparison has recently been made for Arizona and is published by the United States geological survey, department of the interior, as professional paper 98-K, by F. L. Ransome, geologist. The report is obtainable on request from the director.

### Gaining on the Fires.

While fire prevention, once understood, needs advocates no more than fire fighting, there is satisfaction in seeing that official efforts in preventing fires bring visible results. The evidence does not appear conclusively as yet in the yearly totals of fire losses within a single town or district. These figures in their fluctuations reflect the working of factors far steadier than stated inspections and protective orders. In Fall River, for example, the last big fire broke a city's record of routine fire loss only less sharply than did the conflagrations in Salem and Chelsea, Marblehead and Lynn. Or look at Wellesley's loss by fire. Reckoned year and year, it approaches \$25,000. But in 1914, the year of the main hall of the college burned, the figure jumped to \$700,000. Even in the sore cost of our national fire waste, averaging now, from sunrise to sunrise, more than half a million dollars, and absorbing in its enormous aggregate the local ups and downs, the yearly totals zigzag capriciously across their general curve of tendency. Our best endeavors in fire prevention are as those of a man trying to rein the thirty horses of a runaway harvesting machine; we can guide and check a little, we cannot yet bring the out-breaking forces under our control.

But in the number of our fires, year by year, there lies better evidence that our little outlay for fire prevention pays itself back to us over and again. The most convenient means of estimating the fires that would have started had not preventive measures stopped them in advance appears in the totals of the alarms rung in for fire year by year. The alarms for the whole metropolitan district two years ago numbered 13,449; last year they numbered 13,515. But note! In the single month of March, last year—the March that broke the record for rainlessness and kindled grass and woodland fires by the hundred—the alarms mounted to more than four times their normal number. Omit the month in both years and the fairer totals now stand 12,677 for two years ago and 9,926 for last year. Or compare the totals for the first half of 1914, 1915, 1916, omitting the March figures: 772, 3,389, 735. The totals, decreasing in spite of our increase in population and in buildings, run 5,823, 5,913, 4,211.

But even if the number of fires had shown less reduction, or none at all, or as for that an increase, could any one who knows our fire hazards and our carelessness doubt for a moment our need of authoritative watch and ward against our hungriest enemy?—Boston Herald.

### Sure Enough.

A middle-aged colored woman in a Georgia village, hearing a commotion in a neighbor's cabin, looked in at the door. On the floor lay a small boy writhing in great distress while his mother bent solicitously over him.

"What-all de matter wit de child?" asked the visitor sympathetically.

"I spee's hit's too much watermilion," responded the mother.

"Ho! go 'long wit you," protested the visitor scornfully. "Dey eyan't never be too much watermilion. Hit mus' be dat dere ain't enough boy."

### WOMAN SO WEAK COULD NOT SLEEP

Made Well by Lydia E. Pinkham's Vegetable Compound.

North Oxford, Mass.—"I had lost three children and I was all run down and so weak I could not sleep at night. My eyesight would leave me and everything I ate upset my stomach. I was very nervous and if I would start to sweep I would have to stop and lie down before I could finish. I was looking over the paper one day and read of a woman who felt as I did and took Lydia E. Pinkham's Vegetable Compound, so I took it too. Now I am proud to tell you I am feeling fine and have given birth to a boy baby. He is my 'Pinkham' baby. I keep a bottle of Compound in my house always."

Mrs. PETER MARCO, Box 54, North Oxford, Mass.

Sleeplessness, indigestion, weakness, and nervousness are symptoms which indicate a lowered vitality of the female organism, and the tonic, strengthening properties of the good old fashioned roots and herbs, contained in Lydia E. Pinkham's Vegetable Compound, are just what is needed by every woman who is in Mrs. Marco's condition.

For free advice in regard to any annoying symptom write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass.
